The Building of a Home

▼

Since the original stone age when man built his home in a cave of stone and mud, the building of a home has been foremost in the mind of all mankind.

To achieve this, you have saved a sum of money and are ready to select a plan as the most important step in starting the building of your own home.

If you are looking for a small home of good layout and conveniences, the houses contained in this book should meet your requirements. They are designs of good taste and proportions.

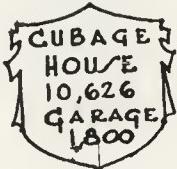

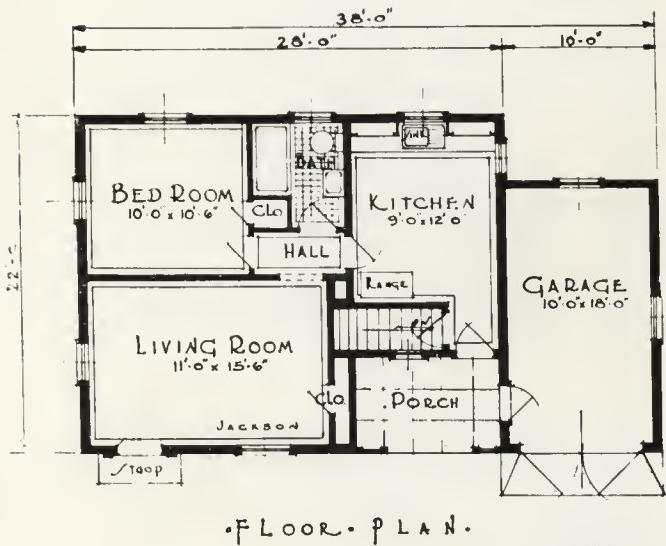

In the building, good materials and excellent workmanship is very necessary. Your Lumber Dealer is most capable of showing you which lumber and other building materials are best and can also advise you in the selection of a good contractor.

Your Lumber Dealer is also equipped to show the proper method to follow in securing your mortgage. He is ready to give you advice on the Federal Housing Administration requirements and can supply you with the blueprint plans and specifications necessary to obtain this mortgage.

His experience in helping hundreds of other home builders has placed him in an enviable position as advisor, which should take a great deal of the responsibility off your shoulders and enable you to fully enjoy the building of your home.

This book offers a selection of small houses that are the latest work of our Architects who have specialized in small home designs for many years and a selection of any of the plans will give you a home you will be proud to own.

• WORKING PLANS •

For a nominal price you can secure complete working plans for homes shown in this book.

Plans furnished contain a complete set of blueprints, a set of specifications, and a complete lumber material list.

Plans are drawn at one-fourth inch to the foot, details at a larger scale. Plans contain all floor plans, four elevations and detail section drawings.

All plans are prepared in Architects' offices and therefore assure you complete layouts, good framing and complete design.

Blueprints are made a very convenient size for handling, 15 x 30 inches for the average house.

Our architectural service is complete, and enables us to prepare any revisions or special plans to order at short notice and at very reasonable prices.
